

Which connecting device fits to your application

FlexiVision 100 - Full HD Inspection System

Features connecting device

FlexiScope 3 camera handpiece

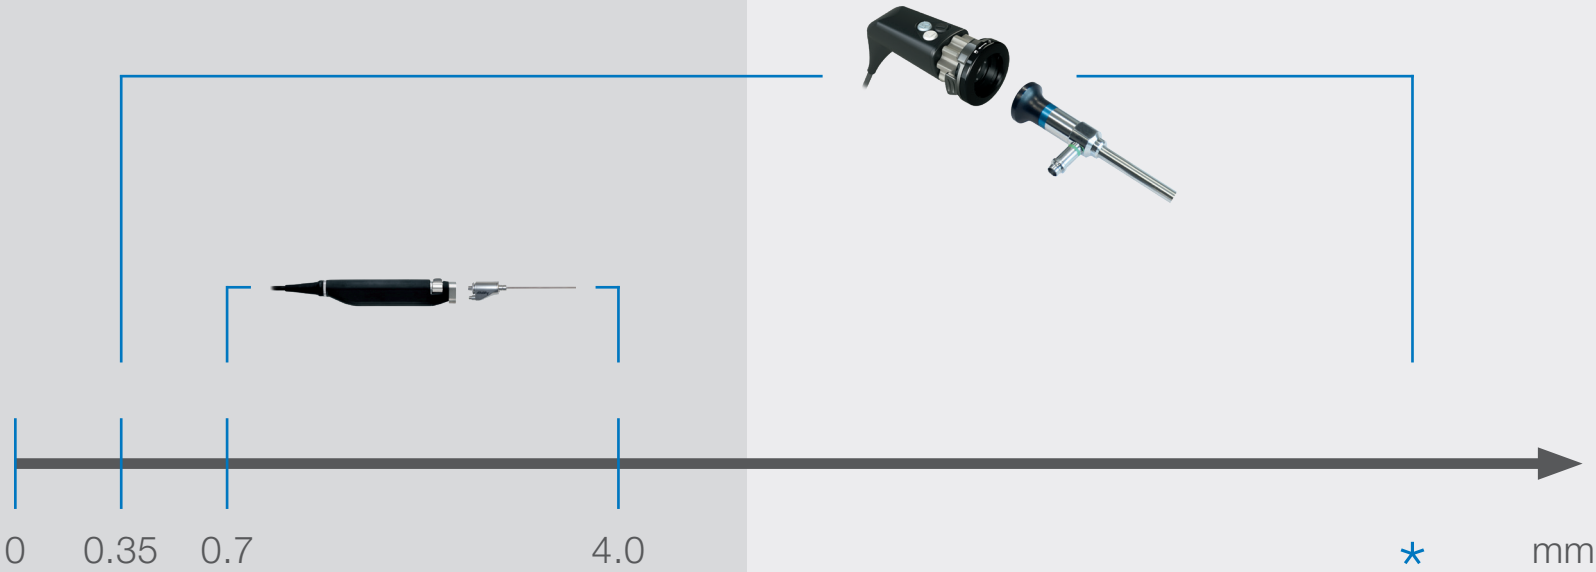

HD camera head

Selection criteria connecting device

- Lies easily in the hand
- For complex components
- For frequently changing tasks
- Existing borescopes can be connected with the HD camera head
- The diameter range depends on the borescope / fiberscope\*

Diameter range connecting device

Manufacturer recommendation

- Especially suited for inline inspections
- Very convenient design, no light guide, for longlasting inspections e.g. 100 % controls
- Especially suited to use your existing borescopes / fiberscopes
