Realignment at Schölly: Changes in Management

As of February 1, 2025, the management of Schölly is in the hands of Stefan Schnekenburger, Chairman, and Günter Olbrich, CMO. The shift to a dual leadership structure occurred after the previous third managing director left the company at his own request.

"We thank Markus Wintz for his excellent performance for Schölly and the outstanding collaboration over the past three years and wish him all the best for the future. With the new structure, we are well-equipped for a company of our size to continue growing successfully and achieve our goals as a technology company," said Stefan Schnekenburger.

In addition to the changes in Executive Management, there are new appointments to the Management Board. Michaela Jaeger, who has joined Schölly from the parent company Aesculap, takes on the position of Vice President Finance and IT. Johannes Köstermenke, who has been with the company for several years, has been promoted to Vice President Global Marketing and Sales.

"These reinforcements in the Management Board are an important step to further expand our market position as an OEM manufacturer of complex visualization systems in our business fields," added Günter Olbrich.

With these changes, Schölly looks very optimistically to the future and relies on a young, competent, and forward-looking leadership.

More information

Schölly Fiberoptic GmbH is a globally active company headquartered in Denzlingen, Baden-Württemberg, and has been part of the B. Braun Group as a subsidiary of Aesculap AG since 2023. The focus is on engineering, registration, production, and worldwide service of customer-specific visualization systems for the business fields Medical Endoscopy and Visual Inspection.

From endoscopes, camera systems and light modules to complex visualization systems, the company offers a wide range of products and services. The entire range of products and services is designed to provide users with an excellent view of their field of application and to open up new perspectives for health and technical progress.

The company was founded in 1973 and employs more than 550 people worldwide; about 350 of them in Denzlingen. The six sales and service subsidiaries, together with the headquarters, are responsible for the support of globally active customers as well as for the acquisition of new projects. The share of development costs is over 10 percent.
